🛠️ Feature List for Candidate Management System

1. Admin Login

- **Frontend**

    - Use the **signup/login page** UI from the existing template.

- **Backend**

    - Use Node.js boilerplate (already available) to:

        - Set up a **static login API** (`/admin/login`) for admin credentials.

        - No signup for admin — only login with hardcoded or `.env` credentials initially.

---

2. Student / Candidate Onboarding (CRUD Module)

- **Create/Read/Update/Delete** candidates

- **Form Sections**:

a. Personal Info:

- Full Name (required)

- Email (required)

- Phone Number (required)

- Short Bio (textarea, optional)
- SEVIS ID, EAD, Degree, supervisor name, supe visor contact info
- Export and share profile option on email

b. Qualification (Dynamic Fields like LinkedIn):

- Add multiple **Education** entries:

  - Degree

  - University/Institute

  - Location

  - Start & End Year

  - Description (optional)

c. Work Experience (Dynamic & Multiple):

- Add multiple **Work Experience** blocks:

  - Company Name

  - Role/Designation

  - Duration (Start & End)

  - Responsibilities / Description (optional)

d. Document Uploads:

- Upload multiple **documents with a label/tag**, such as:

  - CV/Resume

  - Marksheet(s)

  - Degree Certificate(s)

  - Experience Letters

  - Any other (custom label allowed)

- Document type selector and file input with preview.

e. Password Setup:

● Create a Password field (onboarding step or after email verification)

---

3. Candidate Login & Profile View

● **Login Page**: Use the **same sign-in page** as admin, but role-based redirection.

● **Candidate Dashboard**:

  ○ View their **own profile** (all submitted data)

  ○ Ability to update details and re-upload documents

  ○ Optionally show verification status for documents
  ○ Share profile option with or without documents
